Kombi®

EASE OF USE

Detail is everything to the Kombi® Designers
"What the customer desires" was the design brief
and that's what they created.

A strong lightweight machine that rolls
effortlessly on roller bearing wheels with
pneumatic tires, simple to use with only
on/off switch and paint/water valve
selection controls.

It's so easy to use just add paint and
water at your chosen dilution rate,
select line width requirements
from 1 1/2 to 4 inches on the
Knib, ensure paint/water valve
is on paint. Turn on switch and
begin marking. After you have
finished painting, flush
system through with water
and recharge machine with
the Kombi® charger ready
for the next time.

SURFACES

The Kombi® marks on synthetic turf, natural grass,
asphalt and concrete.

CONSTRUCTION

The Kombi® is constructed around a stainless steel
chassis supporting the impact resistant plastic
moulded bodywork consisting of paint tank, water
tank and pump compartment.

Carefully selected materials, design and
construction methods have all come together to
make this a very strong and light weight machine.

PERFORMANCE

A full day's marking from the high performance
battery and a diaphragm pump that delivers
enough paint to mark with two nozzles for hash
marks or running tracks.
